

Special Project: Report on a Country in Europe. (150 points) Due Wednesday 12/7/11

This is a project that everyone is required to complete. You will select one country in Europe to research. You will record your findings on a poster or tri-folder. You will be graded on neatness, completeness & thoroughness. I will go around and discuss with each of you which country you will research. We want to spread the countries out as much as possible. In other word we don't want more that 2-3 persons working on the same country. (We will not be working on Russia or the former Russian republics. We will cover those countries next semester.)

Your presentation should have the following (Use this like a checklist):

1. A Map of your country
2. A Map of Europe with your country highlighted.
3. The language or languages of your country.
4. The most important landforms of your country.
5. Bodies of water & the most important rivers that flow through your country.
6. Ethnic makeup & diversity of your country.
7. Historical Places in your country.
8. Most famous landmarks in your country.
9. Most important cities in your country
10. System of government
11. Absolute & Relative locations
12. Flag
13. Resources & major industries
14. Types of food
15. Other facts that you find interesting

Present your country in an attractive manner that makes others want to learn about it and maybe even visit it someday.

My country is _____
